EXPERIENCE

IBM Manila, Metro Manila
Application Developer-Cloud Fullstack October 2026 - Present

- Completing structured training in cloud and fullstack application development, covering frontend and backend development, databases, APIs, and cloud deployment, with hands-on assessments to validate skills.
- Building practice applications using fullstack and cloud development tools, applying version control with Git and containerization with Docker.
- Applying prior experience in React, Node.js, Python, and testing to coursework, following IBM engineering practices and collaborating with peers and mentors.

SUPERVAISE Manila, Metro Manila
AI Mobile Engineer June 2026 - Present

- Engineered and integrated mobile AI inference pipelines, enabling low-latency model predictions and real-time features.
- Built hands-on lab dashboards and technical exercises, co-leading the Executive AI Workshop for Bounty Fresh and NVIDIA workshops on deep learning and LLMs.
- Profiled and optimized on-device runtime performance, significantly reducing memory overhead and preserving battery efficiency.

XURE APP INC. San Juan, Metro Manila
Quality Assurance Intern January 2026 - April 2026

- Conducted end-to-end testing across their system, covering auctions, wallet, and order flows
- Created test cases, reported bugs, and performed regression testing with cross-team collaboration

DLSU GREEN GIANT FM Manila, Metro Manila
Web Developer October 2022 - October 2024

- Redesigned and developed the station's website using HTML, CSS, and JavaScript
- Utilized GitHub for version control and Docker for containerized development and deployment, while maintaining and updating the website and digital platforms

EDUCATION

DE LA SALLE UNIVERSITY Malate, Metro Manila
Bachelor of Science August 2022 - August 2026
Major in Computer Engineering
Relevant Coursework: Machine Learning, Data Structures & Algorithms, Software Engineering, Database Systems, Computer Architecture, Embedded Systems

UNIVERSITY PROJECTS

AN IOT-ENABLED SYSTEM FOR REAL-TIME FUEL MONITORING, GPS TRACKING, AND ANOMALY DETECTION IN TRUCKS USING NON-PARAMETRIC UNSUPERVISED MACHINE LEARNING August 2026

- Developed a React, Node.js, Supabase, and Flask-based platform with live dashboard views, alert logs, driver compliance tracking, and ML-powered detection.
- Evaluated the system on 20,412 telemetry records from 79 trips, reaching up to 95.7% precision for Isolation Forest and 100% precision for Matrix Profile in controlled tests.

AI-DRIVEN FUEL MONITORING AND ANOMALY DETECTION SYSTEM FOR VEHICLES June 2025

- Collected real-time fuel level and location data and transmitted it to the cloud with low-latency mobile network communication
- Applied unsupervised machine learning techniques (Matrix Profile and Isolation Forest) to detect fuel theft and abnormal consumption patterns

DATABASE-BACKED PAYROLL MANAGEMENT WEB APPLICATION November 2025

- Developed an automated payroll system using React, JavaScript, and MySQL, with persistent storage for employee timesheets, payroll records, and salary breakdowns

- Built CSV upload and processing functionality with role-based payroll calculations, including cashier bonuses and night shift differentials, for accurate payroll processing and reporting

ADDITIONAL

Technical Skills: Proficient in C, C++, Python, MATLAB; skilled in machine learning and anomaly detection (Matrix Profile, Isolation Forest) for IoT applications; proficient in frontend web development (HTML, CSS, JavaScript) with working knowledge of backend development and database integration (Node.js, Supabase, MySQL); experienced with developer tools including Git, GitHub, Docker, Claude Code, and OpenAI Codex
Languages: Fluent in English and Tagalog
Certifications & Training: DLSU Gold Thesis Nominee, An IoT-Enabled System for Real-Time Fuel Monitoring, GPS Tracking, and Anomaly Detection in Trucks Using Non-Parametric Unsupervised Machine Learning (August 2026); Fundamentals of Deep Learning (NVIDIA, June 14, 2025, Credential ID: juxi0I-WTAuiJOS-wznE3w); Computer Technology Program – Work Immersion Completion (Torres Technology Center Corporation, February 2022)
Awards: Best in System Presentation (2022 – Torres Technology Center Corporation); Top Student Award (2022 – Torres Technology Center Corporation); Leadership Award (2022 – Torres Technology Center Corporation); 2nd Place, PowerPoint Non-Linear (2019 – National Student Convention); Outstanding in Academics (2018 – Metro Lucena Integrated Learning Center); 1st Place, Science Exhibit – Theoretical (2018 – National Student Convention)
